Order Sheet for Plants and Bulbs

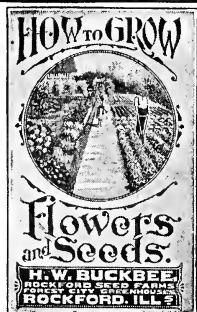

We always recommend having plants sent by express, at purchaser's expense, when there is an express office near, as we can usually send somewhat larger plants, and do not have to wash the soil off the roots (as in the case when sent by mail). We always try to add enough extra plants of our own selection to help pay the charges. Kindly write your list of plants all together on this page (not mixed up with the seeds) so as to prevent any mistake upon the part of our clerks in copying the order. We do not ship plants to Canada, Mexico and Foreign Countries. Be sure to read paragraph marked "Plant Shipments" on Page 1 of Catalog.

Buckbee's New Chinese Jade Plant

Direct from China—the Land of Floral Wonders.

Our original stock of this unusual and attractive novelty came from China where so many of today's most wonderful plants came from. It is a form of *Crassula* or you might call it a Tree *Echeveria*. Easily grown and stands the dry air of the living room without injury. Especially suited for indoor rock and miniature gardens. The distinctive foliage with fleshy leaves about 2 inches long, make a neat and distinctive ornamental plant. Care should be used in watering, as it requires but little moisture. The Front Line Defense Against Hunger!

**To My Friends Who
Believe In Gardens:—**

The question is often asked—Does It Pay to Have a Family Garden? You and I know that it does pay from practical experience, and to those who have any question about the problem, we are presenting illustrative facts on this page based on researches made by the United States Department of Agriculture. In these times of stress, we must conserve our resources and make every minute and every penny count. Let's start the New Year with a firmer determination than ever to have a good sized garden—to grow more vegetables and flowers—to keep a record of costs and sales. One season's profits will prove beyond a doubt that you can make a handsome profit by growing more vegetables.

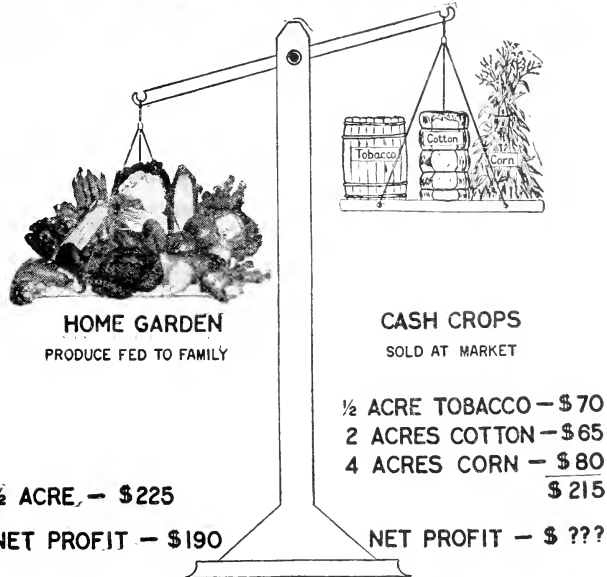

Consider these facts: Today, in every home, there is a big seasonable demand for fresh, crisp "home grown vegetables". Health authorities everywhere say "eat more vegetables". Schools teach the value of vegetables in the child's daily diet. Everyone has been told, and facts prove it, that the vitamins and minerals so generously found in vegetables are necessary to good health. No wonder there is a growing demand for garden products.

Another reason for this growth is the fast-increasing demand for salads in the home. Salads for lunch. Salads to make the daily dinner more appetizing and healthful. The manufacturers of salad dressings are doing a volume of business these days. Vegetable salads are easy to make and there are many varieties. It's hard to find a housewife who hasn't several recipes for vegetable salads. Who raises all these vegetables? Why shouldn't you get some of these good profits?

Have you ever stood near the telephone in a grocery store early in the forenoon when home-grown vegetables are in season? One housewife after another asks about fresh vegetables. Nearly every order calls for them. Somebody has to grow these vegetables. Why not you?

The market for vegetables is a big one—and it is a steadily growing market. There is a daily demand in every community—giving you a steady and profitable income right through the season. Vegetables are easy to raise, easy to care for, and a vegetable and flower garden is something in which every boy or girl in the family can take a real interest.

Consider carefully the figures at the top of this page taken from a recent United States Government Report and then decide to plant a real good garden this year. The satisfaction that you will receive from picking choice crisp vege-

tables from your own garden and the profits that you will receive from your surplus will amply reward you for the time and care that you give your garden. Buckbee's "Full of Life" reliable seeds have a National Reputation of Reliability—we shall continue to serve you faithfully—it will be a pleasure to have you inspect our establishment whenever your time permits, and we shall be glad to have you write us about your garden problems—our sixty-one years of practical experience is yours for the asking.

We will deeply appreciate receiving your orders and those of your friends as early as convenient.

Yours For Success

H. W. Buckbee

Read These Few Words About Reliable Seeds From good seeds only can good crops be grown. Yet a great many contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons we cannot, of course, guarantee or be responsible for a crop, as success is dependent upon natural causes, which are beyond human control. Therefore, we do not warrant in any way, express or implied, the contents, or the description, quality, productiveness, or any other matter of any seeds, bulbs, or plants sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once, and money will be refunded. Subject to above conditions we make this sale, at the moderate prices at which we sell our goods.

We will appreciate receiving your order early this year.

Yours for Success,

H. W. Buckbee

New Jackson Wonder Bush Lima

THE BEST BUSH LIMA BEANS

Buckbee's "Full of Life"
Seeds Are Bred for Disease
Resistant Qualities

BUCKBEE'S IMPROVED BUSH LIMA
Superior Quality, Exquisite Flavor, Fine Color,
Good Shipper, Hardy Grower, Enormously
Productive, Matures Early, Excellent
Keeper.

This is the very "newest" in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. Is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the Beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, flavor unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell Bean for winter use. Send to BUCKBEE for originator's stock seed. Pkt. 10c; ½ lb. 30c; lb. 50c; 2 lb. 95c; 5 lb. \$2.25; 10 lb. \$3.95, postpaid.

NEW JACKSON WONDER BUSH LIMA

Medium Size, Beautifully Colored Speckled Beans.

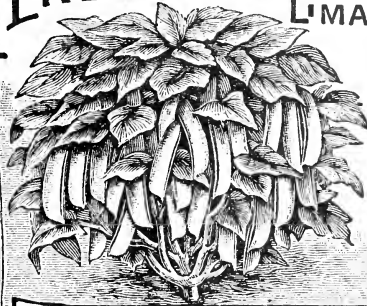

This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. Pkt. 10c; ½ lb. 22c; lb. 40c; 2 lb. 75c; 5 lb. \$1.75; 10 lb. \$2.95, postpaid.

BURPEE'S IMPROVED BUSH LIMA

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden.

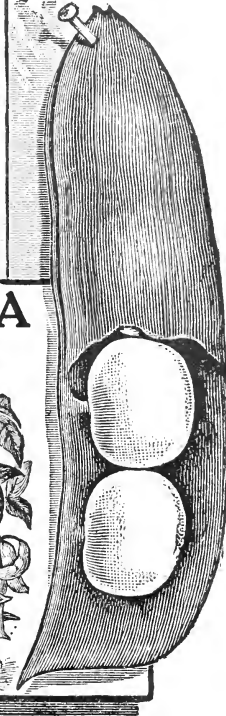

This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee's Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and often measure 24 inches across the top. Pkt. 10c; ½ lb. 25c; lb. 45c; 2 lb. 85c; 5 lb. \$1.95; 10 lb. \$3.45, postpaid.

Pole Bean.

MCCASLAN NEW POLE

The Best Pole Bean in Existence. A White Seeded Green Pod Snap or Shell Bean.

Although only of recent introduction, the McCaslan Bean is already very popular and in many localities has displaced the older pole varieties. It is earlier and more productive than Kentucky Wonder and Golden Cluster and is fully equal to them in quality.

It is the earliest Pole Bean in cultivation. The illustration on this page is taken from a photograph of a single matured plant and shows its immense prolificness. The pods are of dark green color, 10 to 11 inches long, and fill perfectly, containing ten and more seeds. They are fine for use as snap sorts, being entirely stringless, meaty and of the finest flavor and quality. When allowed to mature the shelled beans are of pure white color, good sized and most excellent for Winter use. The vines begin to bear pods quite early and continue to produce enormous quantities until frost.

This is the one Pole Bean for every garden north and south; it stays with you all season, furnishing delicious Beans in Summer and Fall when this vegetable is always scarce.

MANGEL WURTZELS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets.

Plant five pounds of Seed per acre.

BUCKBEE'S MASTODON

It grows well above ground and on account of its shape is easily harvested. In length is about the same as Buckbee's Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. SUGAR BEETS FOR STOCK FEEDING

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

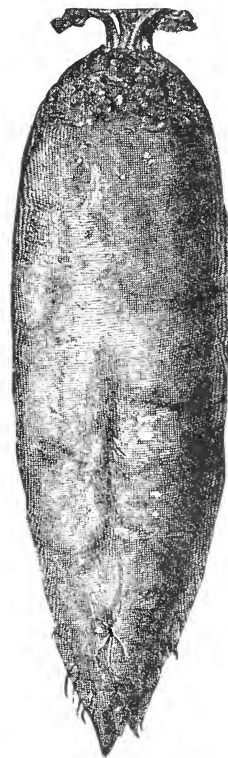

BUCKBEE'S GIANT FEEDING SUGAR

The Greatest Beet for Feeding Stock

The magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield, under equally favorable conditions, more than double that of sugar beets and, not being so sweet, are less liable to injure the kidneys when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 65c; 2 lbs. \$1.25; 5 lbs. \$3.00; 10 lbs. \$5.50, postpaid.

BUCKBEE'S NEW IMPERIAL SUGAR

This Beet is the result of years of methodical and persevering selection. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most satisfactory results. The heads are very attractive in appearance, of splendid quality, tender, fine grained and of sweet, delicious flavor. We control the entire stock of this earliest of all Cabbage. Buckbee's Famous Great Dane

The Hardest Headed Late Cabbage. The Gardener's Favorite, the Best Shipping and Longest Keeping Cabbage.

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply. To get to the source of this supply, we sent an expert to Denmark, who after careful inspection of the Cabbage-growing localities found at the Island of Amagar the GREAT DANE Cabbage, which he considered by far the finest and most productive of all the types grown in Denmark, and he contracted with its originator for all the seed he could supply. The stem is medium sized, heads are almost as round as a ball, of good size, perfectly solid, very fine grained, of the best quality. We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed

(grown by the originator in Denmark), at the following reasonable prices. Send to Buckbee for the true "Great Dane." Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; 1 lb. \$4.00; 2 lb. \$7.70; 5 lb. \$18.00; 10 lb. \$31.75, postpaid.

Buckbee's Chinese or Celery Cabbage

A New, Most Delicious Vegetable Which Should Be in Every Garden and Which Is One of the Most Profitable Crops to Grow for the Market. As Tender as Lettuce; Flavor as Delicate as Celery.

The Chinese or Celery Cabbage belongs to the Cabbage family; when young, it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, often weigh 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and has as distinctive a flavor, being very

delicate and pleasant; every leaf, including the outside ones, is tender and edible. It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French Dressing, it makes a splendid cold slaw. It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower. Our seed is Chinese grown, which is the only reliable stock for good solid heads. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 85c; ½ lb. \$1.50; 1 lb. \$2.75, postpaid.

BUCKBEE'S "Full of Life" CARROTS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities.

The best soil for the Carrot is a sandy loam made rich by manuring the previous year; any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 2 to 6 inches apart in the row, according to the size of the variety.

BUCKBEE'S SELECT DANVERS

THE BEST STOCK CARROTS

Every farmer should plant a few acres of Carrots for stock food; they are very productive, less liable to disease than many other root crops, and being sown earlier do not interfere so much with the labor in the busy time. They can be stored over Winter like Potatoes. Make excellent nutritive feed for all stock. Horses are very fond of them and they increase the flow of milk in cows, improve the quality of butter and give it a beautiful golden color.

Buckbee's Champion

The World-Beating Stock Carrot.

Buckbee's Champion is not, properly speaking, a table Carrot, although the flesh is remarkably firm and sweet. But it is most emphatically a Stock Carrot for the farmer and stock raiser, and once used nothing will take its place. It is the heaviest cropping variety grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. The roots are of medium size, very broad and heavy at the shoulder and are therefore easily harvested. BUCKBEE'S EXTRA EARLY CHIEF CAULIFLOWER

The Earliest Grown—A Sure Header—Drought Resister—Large Solid Heads of Snowy Whiteness

The best variety for either market or family purposes, by far the earliest and surest large header and the most profitable grown. It is of very compact growth, with very short stalks. The heads being so extremely solid and deep, weigh heavier than any other early variety. It can be used for early or late planting, for forcing or the open ground; used any way, we recommend it with the full assurance that it will give entire satisfaction and that it is not surpassed by any other

variety in earliness and sure heading. Comparative tests have proved conclusively that Buckbee's Chief matures earlier, is a surer and heavier cropper and produces more marketable heads per acre than any other Cauliflower of equal size.

BUCKBEE'S "FULL OF LIFE" SWEET CORNS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's New Golden Sunshine.

Buckbee's Everbearing

If You Want Delicious Corn on Your Table the Fourth of July Plant This Extremely Hardy, Early Maturing, Large Eared Sort.

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high; no small item to a gardener; and, as a proof of its quality and sweetness, we have a continuous call for "Everbearing" from our customers year after year. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks. Pkt. 10c; ½ lb. 21c; lb. 38c; 2 lb. 71c; 5 lb. \$1.65; 10 lb. \$2.75, postpaid.

Improved Adams Early

A Popular Sort for Roasting Ears.

While not a sweet corn, this is a tender corn often used for the table, particularly in the South. The ears are about 8 inches long, 12 to 14-rowed, and the kernels are white, somewhat deeper than broad and indented at the outer end. The stalks are about 6 feet high. Can be planted earlier than any Sweet Corn. Pkt. 7c; ½ lb. 15c; lb. 25c; 2 lb. 45c; 5 lb. \$1.00; 10 lb. \$1.75, postpaid.

Buckbee's Best of All

The Largest Eared Sugar Corn.

Early, prolific, sweet, tender, large, handsome. "Best of All" is of exceptionally stocky growth and an abundant and satisfactory yield; ears of large size; kernels very broad and especially sweet, rich, white and tender. Not only is it valuable for family use, but for early market and shipping purposes it is also in the lead. And we can highly recommend it for all general purposes. Pkt. 10c; ½ lb. 20c; lb. 36c; 2 lb. 67c; 5 lb. \$1.55; 10 lb. \$2.55, postpaid.

Buckbee's New Golden Sunshine

The 12 Rowed Golden Bantam.
Early—Sweet—Prolific—Good Size.

This new Sweet Corn is a wonderful improvement over the popular Golden Bantam, as it is larger, sweeter, has 12 rows instead of 8 and is from 10 days to two weeks earlier. The flavor leaves nothing to be desired, as it is rich and sweet and never becomes tough and woody. There is a great demand for this variety and we were entirely sold out early last year, so order early if you desire one of the finest Sweet Corns you ever tasted. Pkt. 10c; ½ lb. 22c; lb. 40c; 2 lb. 75c; 5 lb. \$1.75; 10 lb. \$2.95, postpaid.

Buckbee's Selected Mammoth Early White Cob Cory

Famous for Earliness, Size and Sweetness.

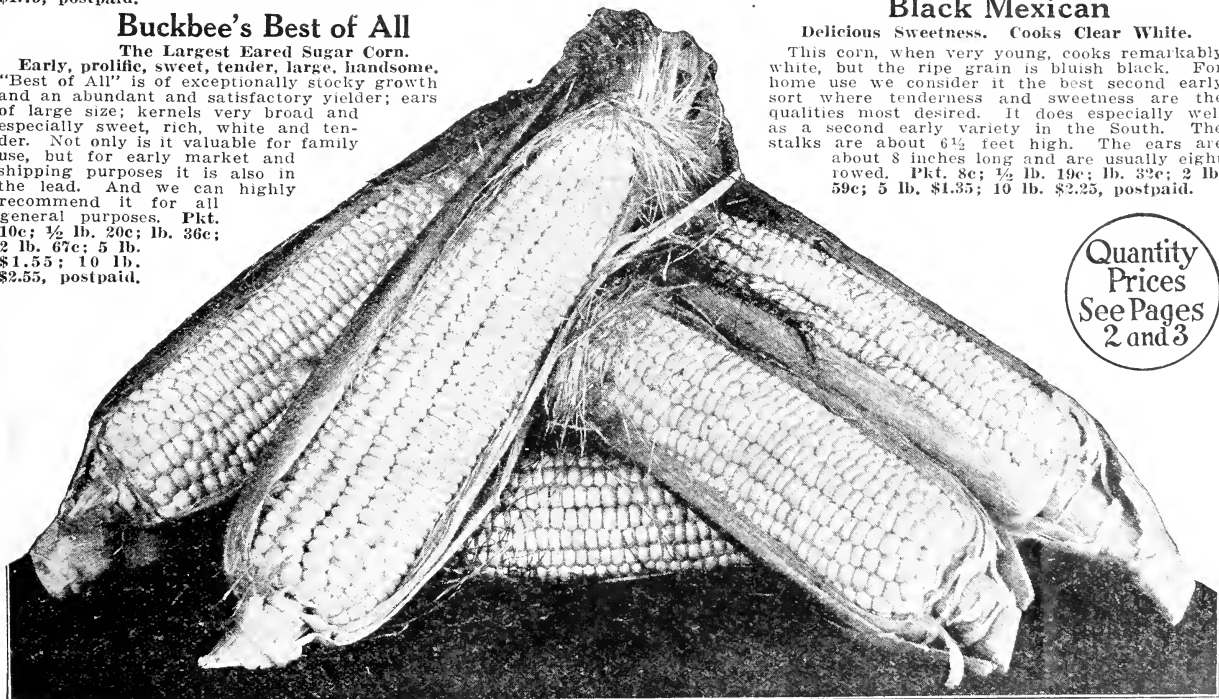

A very fine early variety but somewhat later than Buckbee's Early Sunrise, and is very largely planted by market gardeners to follow this variety; it has proven a well-paying crop for them. Mammoth Cory is a selection from the old White Cob Cory, but its ears are 12-rowed and the kernels set very closely together so that there is no lost space on the cob. The grain is large, broad, very white and of sweet, delicious quality. The plants are vigorous growers of medium height and are very prolific. This is a finely bred Sweet Corn with handsome symmetrical ears and is worthy a place in every garden. Pkt. 8c; ½ lb. 19c; lb. 32c; 2 lb. 59c; 5 lb. \$1.35; 10 lb. \$2.15, postpaid.

Black Mexican

Delicious Sweetness. Cooks Clear White.

This corn, when very young, cooks remarkably white, but the ripe grain is bluish black. For home use we consider it the best second early sort where tenderness and sweetness are the qualities most desired. It does especially well as a second early variety in the South. The stalks are about 6½ feet high. The ears are about 8 inches long and are usually eight rowed. Pkt. 8c; ½ lb. 19c; lb. 32c; 2 lb. 59c; 5 lb. \$1.35; 10 lb. \$2.25, postpaid.

Considered by many the best of the late varieties, as it remains tender and fit for use longer than most sorts, as the ear is enclosed in a thick husk, which keeps it "in the milk." Slender, very deep, white, very tender and lusciously sweet. Pkt. 10c; ½ lb. 22c; 1b. 40c; 2 lb. 75c; 5 lb. \$1.75; 10 lb. \$3.15, postpaid.

Chufas or Earth Almond

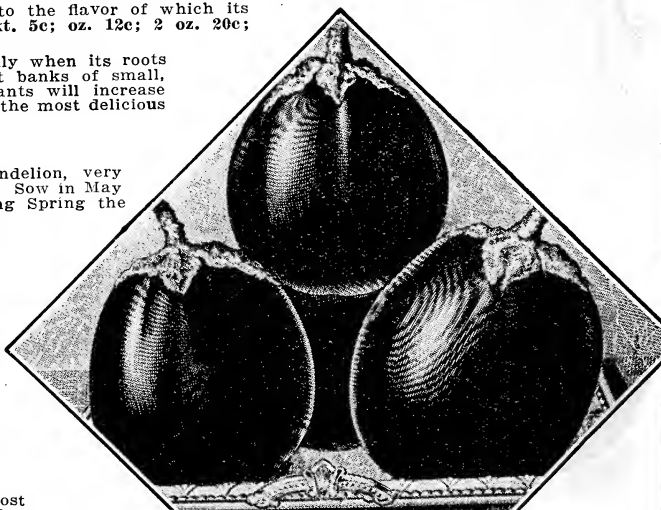

In sweetness and flavor very much resembles a coconut or almond and greatly liked by all children. Vary in size from a large pea to a hazelnut. The nuts grow under and very near the surface of the ground, easily reached and relished by pigs and poultry. As soon as the crop is grown, turn these animals into the field, thus saving the labor of harvesting and feeding. Pull up a few plants by the roots and leave them on the ground, and when either hogs or chickens get a taste of them they will go over the whole field in search for them. Very prolific, nutritious and fattening. Pkt. 10c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; lb. 40c.

Mrs. H. E. Kinsey, Quincy, Kansas—I planted your Coffee Berry, and never saw anything more easily grown. Even drought did not affect it. We could hardly tell it from real coffee when prepared. I have been a customer of H. W. Buckbee for 20 years.

BUCKBEE'S MAMMOTH ALL HEAD LETTUCE

THE WORLD'S ONE UNBEATABLE HEAD LETTUCE

Entirely New and Distinct. The Most Wonderful Market Gardeners' and Shippers' Lettuce Known. The Best Smooth-leaved, Firm-heading, All-season Lettuce. Slow to Run to Seed, Unaffected by Hot Weather. A Sure Header and a Large Header.

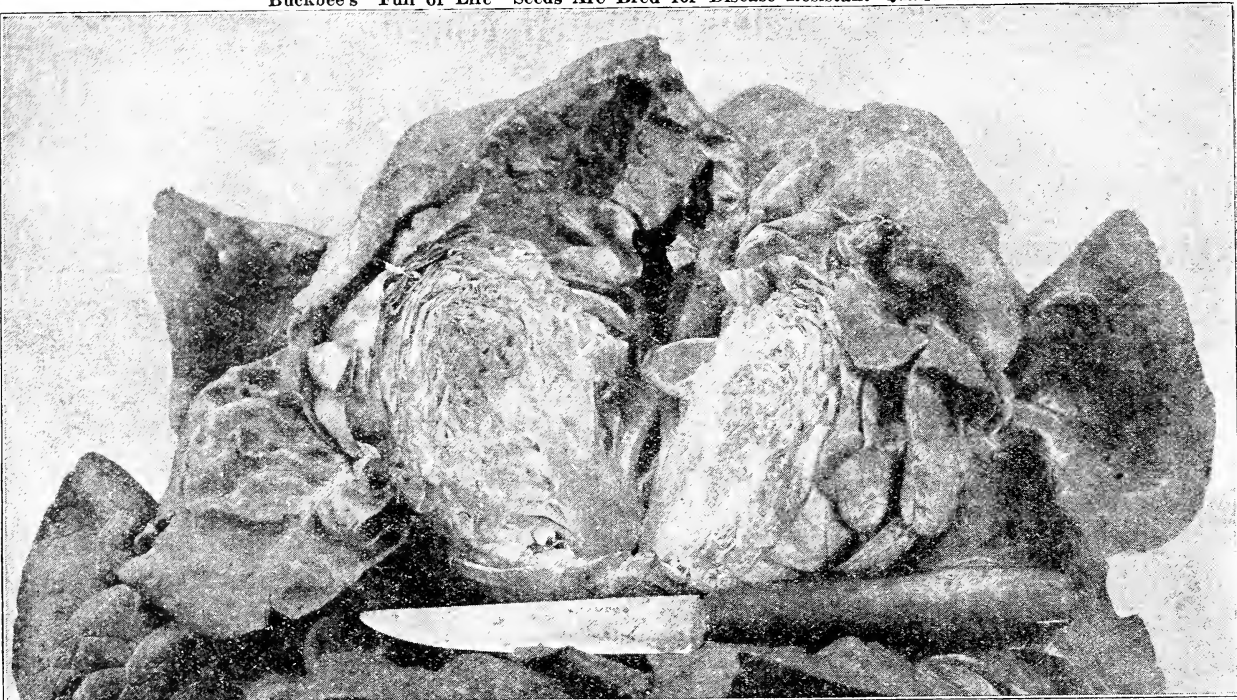

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about ten days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is slow to run to seed, and will not scald or burn and will make a head when other varieties fail. Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have decidedly buttery flavor and are crisp, tender and sweet. This is the grandest, most valuable Lettuce ever introduced. Pkt. 10c; oz. 29c; 2 oz. 55c; ¼ lb. 60c; ½ lb. \$1.15; 1 lb. \$2.15; 2 lb. \$4.20; 5 lb. \$10.25; 10 lb. \$19.40, postpaid.

Buckbee's New Strawberry

Delicious Quality; Rich and Spicy, with the True Strawberry Flavor.

Flavor like that of a strawberry, hence the name. It grows to be a desirable market size; the fruits weigh from 5 to 7 pounds each. Its smooth, deep flesh is of an attractive pinkish-rose color, particularly soft and melting, and with that exceptionally delicious strawberry flavor leaves nothing more to be desired in a musk melon. Mr. Beck, the veteran melon grower, who honored us with the introduction of the Strawberry Musk Melon, writes: "This grand melon was originated by planting the most luscious variety of strawberries between every other row of a New Hybrid Musk Melon that I had previously perfected." We can heartily recommend Buckbee's Strawberry as having no superior as a home garden and market melon. Beautiful Color—Ideal Size—Uniform Shape—Exceptionally Good Keeper—Wonderful Flavor—Always at Its Best.

Unexcelled for Home Use or the Market.

Buckbee's Prizetaker.

Buckbee's Genuine Prizetaker Onion has proved itself to be one of the handsomest and most productive large Yellow Globe Onions which are grown extensively today. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year round. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an "Award of Merit" from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so. The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is rather pale yellow, the flesh pure white throughout. It is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared, it is unsurpassed.

Buckbee's Pedigree Large Red Wethersfield

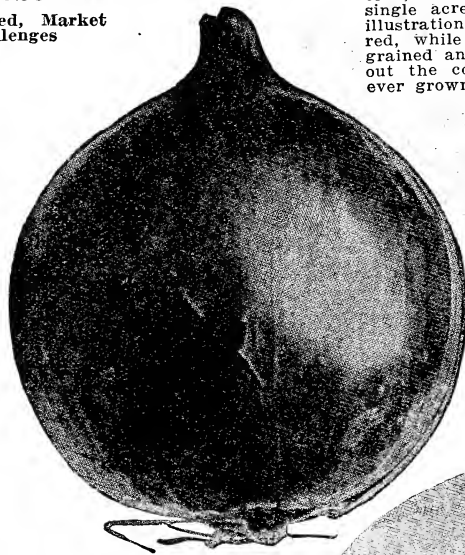

The Most Attractive Large, Red Onion—Flesh Fine Grained, Firm and Mild—Heavy Yields and Sure Cropper—Our Leading Specialty.

One of the chief departments of our seed growing business consists of growing Buckbee's Pedigreed Red Wethersfield Onion for seed purposes only. Our stock has reached such a high point of merit that it is a household word everywhere that "Buckbee's Pedigree Red Wethersfield Onion Seed is the most reliable and produces more good marketable Onions per acre than any other offered." And from the many thousands of unsolicited testimonials which we have received from all over the country we have every reason to believe that the time which we personally spend in our onion fields is truly appreciated by our many thousands of customers who stand by us and say: "Buckbee's Seeds are Full of Life." There are many strains of this justly celebrated Onion offered, but we venture to say none can surpass Buckbee's Prize Medal Stock of this famous variety. The various strains, good, bad and indifferent that are generally offered to the unwary planter come to maturity all the way from August up until as late as October. This unreliability of cropping is very disastrous to most localities.

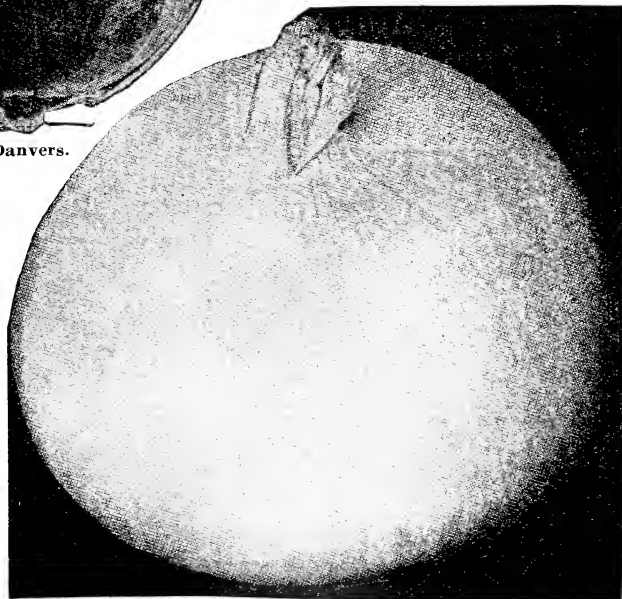

The seed which we are offering is of the earliest maturity, grown from hand-sorted bulbs that will produce Onions of immense size: 1½ to 2½-pound Onions from our seed are of frequent occurrence. BUCKBEE'S RED WETHERSFIELD ONION grows with unusual regularity, scallions being un-1,000 bushels have frequently been raised upon a single acre. The shape is accurately shown in our illustration. In color the skin is a deep rich, purplish red, while the flesh is of a beautiful white, firmly grained and of good flavor. Our customers throughout the country endorse it as the best Red Onion ever grown.

We trust no Onion grower who receives our catalogue will fail to try at least a small quantity of BUCKBEE'S RED WETHERSFIELD ONION, for all ought to know how much superior it is to other strains offered. BEAN**Buckbee's New Monarch Wax Bean**

The Only "Sure Crop" Wax Bean Ever Grown. Heavy Yields. Entirely Stringless. Large Pods. Beautiful Color. Sure Cropper. Crisp and Tender.

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by $\frac{1}{2}$ inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean Buckbee's New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. We control the entire stock of Buckbee's New Monarch Wax Bean. Send to Buckbee's for choicest stock seed of our own growing; especially selected for disease resistant qualities. Pkt. 10c; $\frac{1}{2}$ lb. 35c; lb. 55c, postpaid.

This Onion was first grown in Spain where it was a great favorite—the supply never being equal to the demand. A small supply of seed was finally secured and planted in this country, and we are now able to offer it to our friends. In general color and shape it resembles Prizetaker and Denia, but it is a distinct type and neither of those wonderful varieties can ever be compared with our Sweet Spanish. Color is a light yellow or straw color, the flesh pure white, of very fine grain and exceptionally sweet. As Denia is nearly twice the size of Prizetaker, so is our Sweet Spanish twice the size of Denia. We have seen 7 Sweet Spanish Onions set side by side on a yardstick and reach from end to end. Buckbee's New Hearts of Fire Tomato

This Grand New Tomato Is as Nearly Perfect as Any We Have Ever Seen. Fruits Are of Uniform Size, Heavy, Solid, Attractive, Sweet, Smooth, and of Unequalled Flavor

Too much praise cannot be given this Tomato, as it is in a class by itself, being equally desirable for any use for which Tomatoes are grown. Its perfect shape and color commend it to the market; its size, quality and flavor make one of the best for all table uses, and its earliness, solidity and productiveness make it valuable for the canner. It is surely a wonder Tomato, and can be used for market canning or home garden. The vines are strong growers, but not rampant enough to decrease the yield of the fruits. On the contrary this New Tomato is one of the heaviest yielders we have. The fruits are large, often weighing a pound or more and are perfectly smooth, and seldom crack. Color is a rich, bright crimson and penetrates clear through the fruit. There are few seeds, making nearly solid flesh. Shape is well shown by illustration. Matures very early for such a large variety and continues to bear its large, solid, smooth, finely shaped fruits until the plants are killed by frosts. We control the entire stock of this Tomato. Pkt. 15c; ½ oz. 25c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50, postpaid.

TWO WONDERFUL GARDEN PEAS

Buckbee's New Vigorosa

The Most Magnificent Of All New Productions. Nothing Like It For A Second Early Pea Has Ever Been Produced. It Requires No Support. There Is No Pea More Prolific. It Is A Leader In The Market And In Demand Among Epicures. To Try It Is To Surely Succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled. No bushing at all is required. The vines grow to be but 20 inches tall and are so stout they bear immense crops without falling. As an enormous yielder the New Vigorosa ranks first, and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. Pkt. 10c; ½ lb. 23c; 1b. 42c; 2 lb. 79c; 5 lb. \$1.85; 10 lb. \$3.20, postpaid.

Grant's Favorite

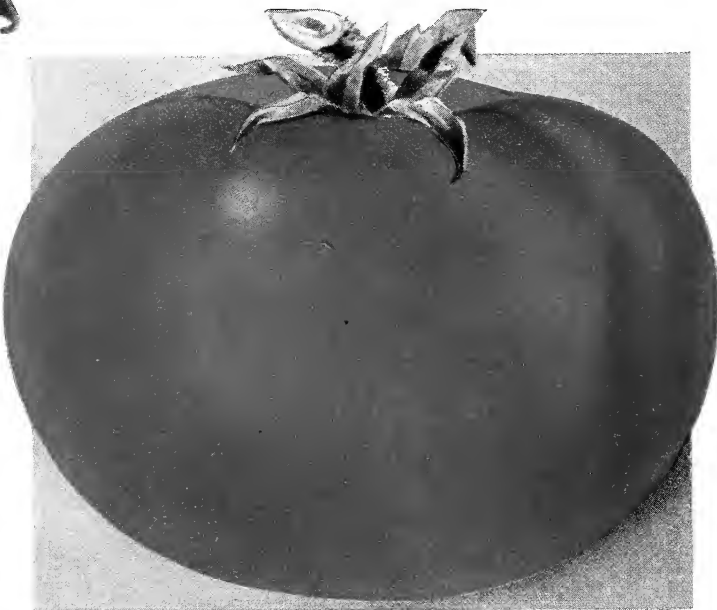

The Ideal Home Garden Pea. Tall Vines, Large Pods; Luscious Peas Which Are Rich and Finely Flavored.

This fine variety of our own introduction is unquestionably the sweetest late Pea ever offered, coming into use just after the early varieties are through bearing. A luxuriant grower from 4 to 5 feet high. The pods are of good size, and always well filled with exceptionally sweet and highly flavored Peas. It is nearly an upright grower, but will do better if staked or planted along a fence. Pkt. 8c; ½ lb. 21c; 1b. 38c; 2 lb. 71c; 5 lb. \$1.65; 10 lb. \$2.80, postpaid.

Bruce Wilkerson, Acme, Texas—We are ordering your Peas again, as the seeds we bought from you last produced more Peas, and throughout the season, while neighboring gardeners' crop were dried up.

One-half pound each of Buckbee's New Vigorosa and Grant's Favorite—two of the world's finest Peas, for only 38 cents, postpaid.

J. G. Henry, St. Peters, Mo.—Buckbee has the finest Peas I ever saw. Large, well-filled pods. We had Peas continually until late August.

BUCKBEE'S "FULL OF LIFE" ONION SEED

Buckbee's "Full of Life" Onion Seeds Are Bred for Disease Resistant Qualities.

Buckbee's White Pickling

This distinct variety is the very earliest Onion in cultivation. Of a pure paper-white color, very mild and delicate in flavor; from 1 to 1½ inches in diameter and ¾ of an inch in thickness. Its extreme earliness makes it very valuable for early table use as well as bunch Onions for market. Pedigreed stock seed. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

Extra Early White Queen or White Pearl

A silver-skinned variety of remarkably quick growth. Small bulbs, flat, of mild flavor. Particularly valuable for pickles. Pkt. 7c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25.

Early White Welsh

For Green Onions. A most desirable green bunch Onion. It does not form bulbs, only enlargements at the base of each shoot, which are quite attractive and, being extremely early sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial can remain in the ground for years. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c.

Australian Brown

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh white, mild and agreeable. A sure cropper. Pkt. 7c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25; 2 lb. \$2.10; 5 lb. \$5.75; 10 lb. \$10.95, postpaid.

Buckbee's Round or Yellow Danvers

Very handsome in appearance. Flattened, but thick through, of fine size; in fact, it is ideal in every respect for market and family purposes. Skin is thin, of a rich straw color. Flesh is pearly white, fine grained, firm, mild and of excellent quality. Ripens early, keeps well and sells rapidly. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 7c; oz. 12c; 2 oz. 21c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.35; 2 lb. \$2.60; 5 lb. \$6.25; 10 lb. \$11.90, postpaid.

Buckbee's Selected Yellow Globe Danvers

Buckbee's strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces 800 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as Southport Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 7c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 85c; lb. \$1.60; 2 lb. \$3.10; 5 lb. \$7.25; 10 lb. \$12.95, postpaid.

Ebenezer or Japanese.

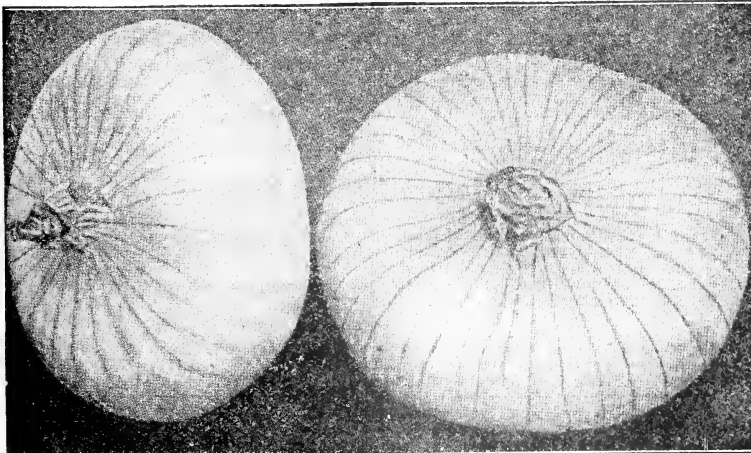

Ebenezer or Japanese

Mild Flavor; Excellent Keeper; Heavy Yields

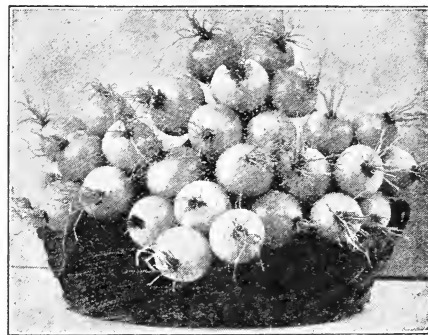

Those who want a nice mild Onion for their own use would do well to try the Ebenezer, as it is the mildest flavored Onion we have ever tasted. The flesh is white, firm and of a very delicate flavor. The Onions are large, somewhat flattened, yellow skinned and have very small tops and mature early. They will keep sound and hard all Winter. Pkt. 8c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25; 2 lb. \$4.30; 5 lb. \$10.25; 10 lb. \$18.50, postpaid.

Buckbee's Genuine Bermuda Onion Seed

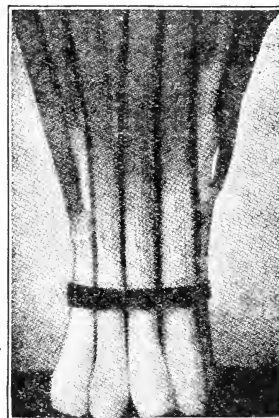

Bermuda Onions are largely grown in the South and have proven a most profitable crop. They are planted there in the fall and shipped North in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1 inch in size.

CRYSTAL WHITE WAX—This new variety is a large, pure-white flat Onion. It is the earliest and most popular Onion with the large growers in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slicing, the color being so clear and pure. Our stock seed each year is imported direct from Canary Islands, where the only True Bermuda Seed is grown. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 85c; ½ lb. \$1.60; lb. \$2.95.

WHITE OR YELLOW BERMUDA—Bulbs broad and flat in form. The color is not a clear white, but rather a pale straw; flesh crisp, solid and mild, early ripening. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.25; lb. \$2.35.

RED BERMUDA—Similar in form and early ripening to the Bermuda White, but grow larger in size, ranging from 3 to 4 inches in diameter; very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.40; lb. \$2.65.

Buckbee's New Sugar Parsnips.

PARSNIPS

The value of the Parsnip as a table vegetable is well known but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots, more nutritious than turnips and very valuable for dairy stock.

Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow and uneven in growth, it should be sown as early as possible in drills $2\frac{1}{2}$ feet apart; cover $\frac{1}{2}$ inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to 6 inches apart in the row.

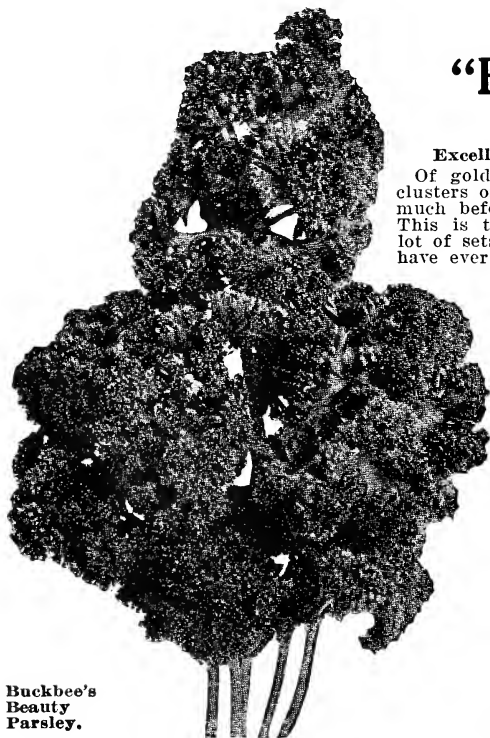

Buckbee's New Sugar

Parsnips are one of the few Winter vegetables. The roots are hardy and are improved in flavor by the action of the frost.

After repeated trials at Rockford Seed Farms we have no hesitancy in offering Buckbee's New Sugar as the best Parsnip grown. Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine grained and of the most excellent quality. A magnificent cropper, yielding as high as 750 bushels per acre under good cultivation. You will not be disappointed by planting BUCKBEE'S NEW SUGAR PARSNIP. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; 1 lb. \$1.50; 2 lb. \$2.95; 5 lb. \$7.25; 10 lb. \$13.50, postpaid.

Improved Hollow Crown

An excellent variety for the table. The roots grow to a length of about 15 inches with a diameter at the top of 3 inches. Very productive. Pkt. 5c; oz. 12c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 50c; 1 lb. 90c; 2 lb. \$1.75; 5 lb. \$4.25; 10 lb. \$7.95, postpaid.

PARSLEY

Buckbee's Beauty

Leaves Are Finely Cut, and Heavily Curled. Foliage Is Very Attractive, and Uniformly Emerald Green.

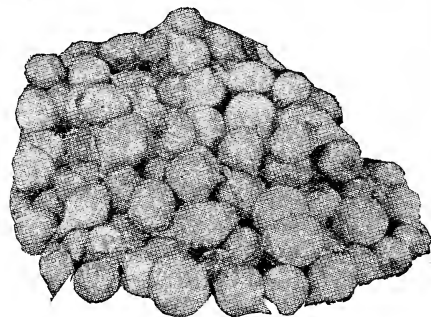

A distinct and handsome variety of quick, robust growth forming compact, ornamental plants, densely furnished with strong-stemmed graceful leaves, finely cut, most beautifully curled, and of that brilliant emerald green color so highly attractive when used for garnishing. The flavor of the leaves is also unusually rich and aromatic, rendering this variety of special value where used for flavoring, in sauces, dressing, etc., either when fresh or dried. Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 75c; 1 lb. \$1.25.

New Moss Curled

Invaluable as a garnishing plant and suited for mixing with dwarf, ornamental foliage plants in the garden. This is a vigorous, compact growing variety, excellent for garnishing and flavoring, and a handsome decorative plant. The leaves are very finely cut and so closely crisped or curled as to resemble bunches of moss. Owing to its uniformly fine deep green color and very attractive foliage, this is one of the most popular sorts for both market and home garden. Pkt. 7c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 60c; 1 lb. \$1.00; 2 lb. \$1.95; 5 lb. \$4.75; 10 lb. \$8.90, postpaid.

Hamburg Turnip Rooted

The edible portion of this variety is the fleshy root which resembles a small parsnip and has a flavor similar to Celeriac; it is extensively used for flavoring soups and stews. Pkt. 8c; oz. 12c; 2 oz. 20c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25, postpaid.

Choice Bottom Sets.

BUCKBEE'S "FULL OF LIFE" ONION SETS

Buckbee's New Yellow Potato

Excellent for Green Bunching Onions—Very Early and of Rich, Mild Flavor.

Of golden yellow color, excellent quality and good keepers. The bulbs produce clusters of small ones often as many as twenty from a single bulb. Onions are ripe much before any other variety. Excellent for Green Onions and also for pickling. This is the Onion to plant for all purposes. We have grown an unusually fine lot of sets this year and although there is a short crop, the quality is the finest we have ever had. Postpaid, $\frac{1}{2}$ lb. 25c; 1 lb. 45c; 3 lbs. \$1.10.

Egyptian or Perennial Tree Winter Sets

This variety never forms a large bulb. Its value lies wholly in its special adaptability to produce green Onions for Spring or Fall uses. It is perfectly hardy, and when once set out will come up year after year. Should be planted in the Spring. We also supply these sets for shipment September 1. This variety increases by producing sets at the top of the stalk and does not produce seed. Postpaid, $\frac{1}{2}$ lb. 18c; 1 lb. 30c; 3 lbs. 70c.

Bottom Onion Sets

Bottom Onion sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seed. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the sowing of another crop on the land the same year. Every private garden should contain a sowing of sets.

BUCKBEE'S "Full of Life" PEANUTS

Our "Full of Life" Peanuts Are Grown for Seed Purposes Only and Are the Finest That Can Be Grown.

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, but now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a hundred million bushels of Peanuts have been ground up by oil mills for oil and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 80 gallons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanut oil is fully equal to olive oil and Peanut meal makes hard hog-flesh. The Peanut Family contain a larger percentage of oil than the other legumes and are wanted by the oil mills who now pay a higher price for a bushel of them than for cotton seed. In the South, especially on a sandy land, Peanuts will supplant cotton as a money crop, being more profitable. The cultivation of this crop is also every year extending farther north, and on suitable soil in the northern states Peanuts will make a profitable crop for stock feed where Indian Corn thrives and with a season of only four months free from frost. Plant in rows $2\frac{1}{2}$ to 3 feet apart and 6 to 8 inches apart in the rows. The Seed Peanuts are planted either shelled or in pods, using $1\frac{1}{2}$ peck of shelled or 2 bushels in pods per acre. The pods may also be broken in 2 parts, soaked in water and then planted at once. The larger varieties are mostly planted shelled at the rate of $\frac{1}{2}$ bushel per acre. Planting must not be done until the weather is warm. Cultivate until they begin to form pods. When they mature pull them up, turning the roots to the sun. In bright weather they will be cured in 24 hours. They must be pulled before frost.

NEW MAMMOTH VIRGINIA

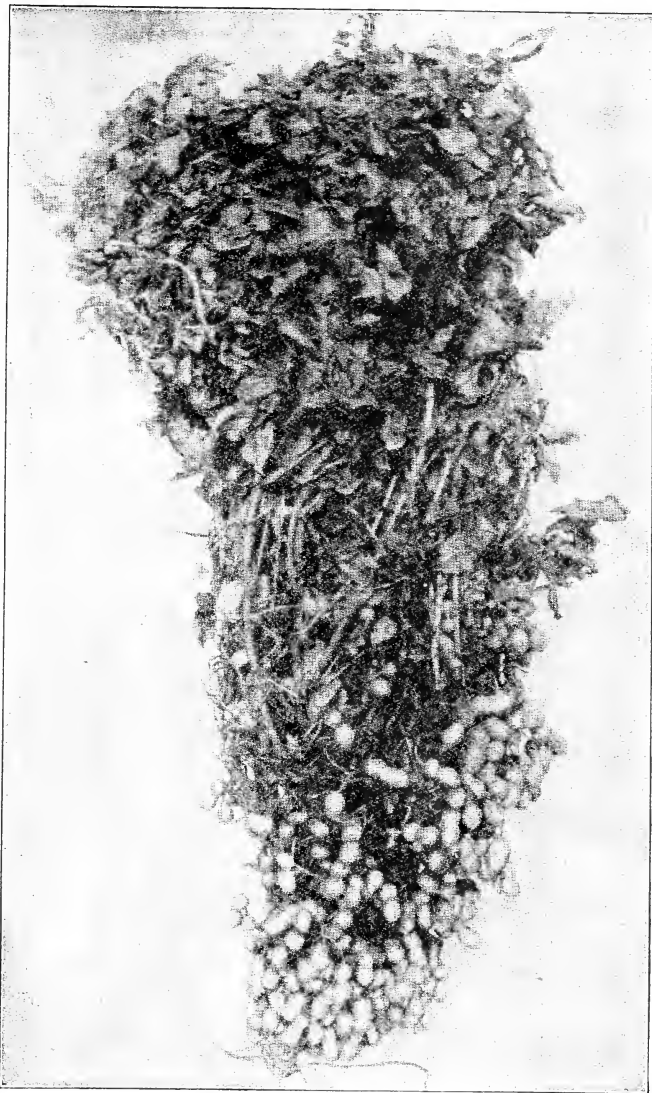

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier, yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season. The standard variety for roasting. Postpaid, pkt. 8c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 5 lbs. \$1.85. By express, not prepaid, 5 lbs. \$1.50; 10 lbs. \$2.50.

NEW EARLY LONG POD BUSH

Originated by one of the best Peanut growers in the South and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on most all kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish Peanuts. The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Well adapted for stock feeding. Postpaid, pkt. 10c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; 1 lb. 45c; 5 lbs. \$2.10. By express, not prepaid, 5 lbs. \$1.75; 10 lbs. \$3.00.

MRS. O. M. BAIRD, Homer, Ill.—We planted $\frac{1}{2}$ pound of Buckbee's Mammoth Virginia Peanuts last year, and raised over two bushels in spite of the dry weather, and they were fine—so nice and big.

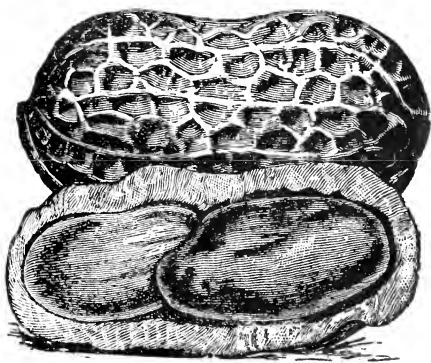

MRS. CHAS. LIRCHGESSNER, Stapleton, N. Y.—The seeds I have bought from you in the last several years are fine. I must say that every seed came up and I am real satisfied.

A Single Plant—New Mammoth Virginia Peanuts.

NEW DIXIE GIANT

The Jumbo of the Peanut family; owing to its extremely large size and handsome appearance is very desirable in every market, always bringing fancy prices. Plants grow about 18 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pods. Should yield a gallon of nuts to one kernel planted. Postpaid, pkt. 10c; $\frac{1}{4}$ lb. 18c; $\frac{1}{2}$ lb. 30c; 1 lb. 50c; 5 lbs. \$2.10. By express, not prepaid, 5 lbs. \$2.25; 10 lbs. \$4.00.

New Dixie Giant Peanuts.

New Early Long Pod Bush Peanut.

SPANISH PEANUT

The earliest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant and heavy foliage; the pods cluster at their base. Pods are small but well filled with nuts of sweeter and finer flavor than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 100 bushels of nuts have been harvested. Can be cultivated with the plow. Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. Postpaid, pkt. 7c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 22c; 1 lb. 35c; 5 lbs. \$1.60. By express, not prepaid, 5 lbs. \$1.25; 10 lbs. \$2.00.

BUCKBEE'S "FULL OF LIFE" PEAS

Buckbee's Lightning Express

Earliest Pea in the World—Ready for Picking in 40 Days.

Much hardier, more productive and withstand greater changes in the weather than any other variety. They are not only the largest podded white seeded early, but they are entirely free from runners and the entire crop can be taken off in one or two pickings. 10,000 bushels sold annually. Where earliness, productiveness, uniformity of ripening, large-sized pods and sweetness of flavor are desired, this is the variety to grow. It may be truly called the blooded stock of all finest early Peas, and stands at the head for above fine qualities. In favorable season ready for the markets in 40 days. To the market gardener earliness is of the greatest importance, as even a few days make a great difference in price, often a depreciation of from \$2.00 to \$4.00 per barrel. Pkt. 10c; ½ lb. 25c; 1 lb. 40c; 2 lb. 75c; 5 lb. \$1.75; 10 lb. \$2.95, postpaid.

New Early Gradus or Prosperity

The Earliest, Largest Podded Wrinkled Pea.

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Earlies, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3½ feet high, requiring no sticks or brush, but sticks may be used if preferred. The vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4½ to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. These Peas retain their color and attractive appearance after cooking. Gradus is adapted to all purposes of the market gardener and does equally well in the home garden. Pkt. 10c; ½ lb. 21c; 1 lb. 38c; 2 lb. 71c; 5 lb. \$1.65; 10 lb. \$2.75, postpaid.

Thomas Laxton

Extra Early Large Podded Sweet Wrinkled Pea.

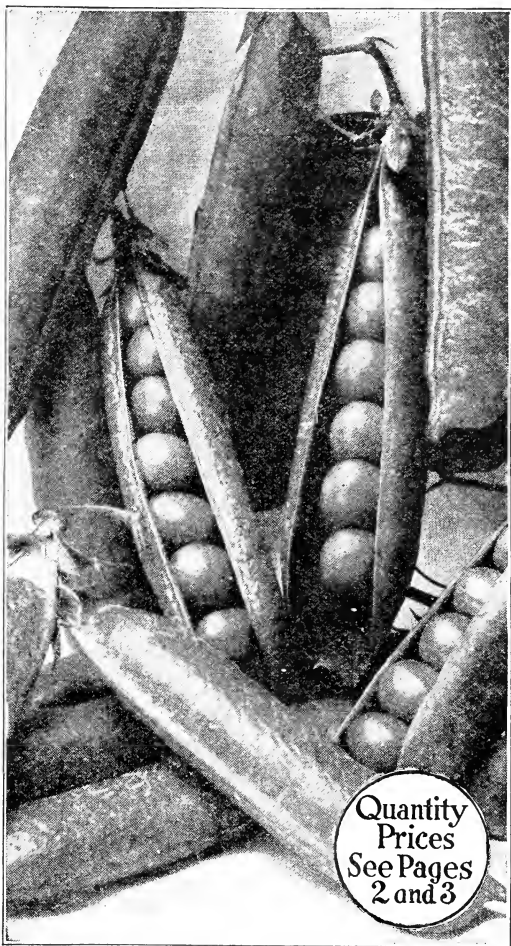

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden. Pkt. 10c; ½ lb. 20c; 1 lb. 35c; 2 lb. 65c; 5 lb. \$1.50; 10 lb. \$2.45, postpaid.

Sutton's Excelsior

Extra Early, Dwarf, Wrinkled. Heavy Cropper. Large, Massive Pods. Rich, Delicious Flavor.

Early and productive, with large broad pods. It grows about 15 to 18 inches high, and is an exceedingly heavy bearer. The pods are 3½ inches long, very broad, square at the end, and are packed with 6 to 8 immense wrinkled Peas. It is one of the sweetest Peas grown, and is unexcelled in delicious, melting quality, and superb, rich flavor. The vines and pods are of a light green color. Pkt. 8c; ½ lb. 21c; 1 lb. 37c; 2 lb. 69c; 5 lb. \$1.60; 10 lb. \$2.65, postpaid.

Buckbee's Little Marvel

A New Dwarf Extra Early Pea of Unusual Value, in Enormous Demand Among Market Gardeners.

We are sure that as soon as a gardener becomes acquainted with this variety he will quit growing the old varieties. In season this new sort ripens with the American Wonder, while the pods, usually borne in pairs, are more numerous, larger and contain one or two more Peas. Its two striking features are: The beautiful dark green color of the pods and its great keeping qualities, when ready for the table staying in excellent condition for a week longer than other similar earlies. Quick growth is one of the main essentials for a crisp and tender Radish. Buckbee's Rapid Forcing matures in about 14 days from sowing. Buckbee's New 50-Day Tomato

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes

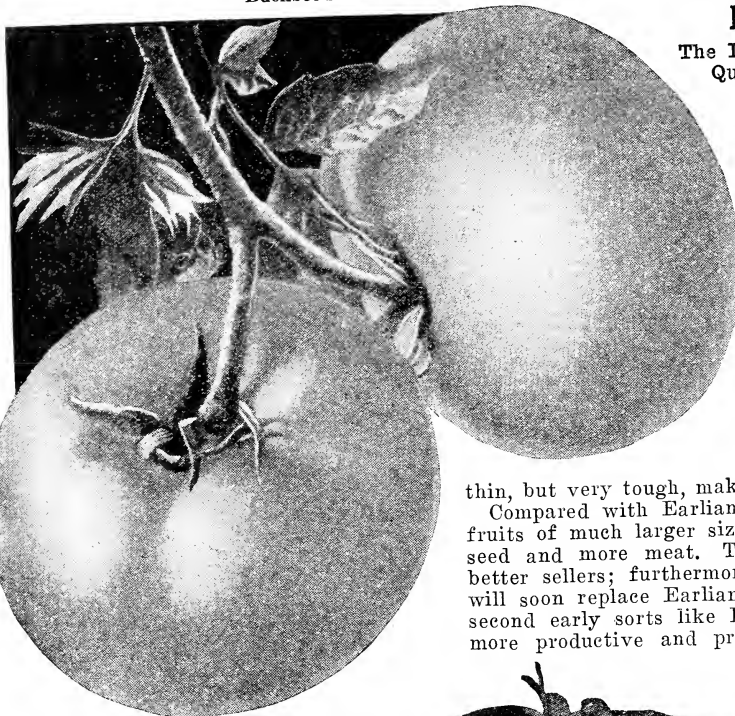

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is

thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and it should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only

Buckbee's Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.50; ½ lb. \$2.60; 1 lb. \$4.75.

The vines are large, vigorous and very productive. Buckbee's Improved Strain of this old and valuable variety is the finest on the market, being larger, smoother, more uniform in size and shape and of brighter color than that offered by others. Pkt. 7c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; 1 lb. \$2.25; 2 lb. \$4.40; 5 lb. \$10.75; 10 lb. \$20.95, postpaid.

An Extremely Early, Smooth, Bright Red Tomato of Good Size and Flavor.

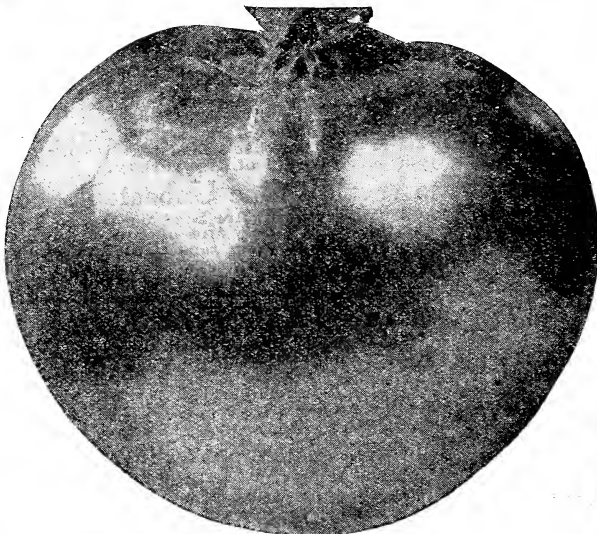

Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Send to Buckbee for the earliest strain. BUCKBEE'S EARLIEST MARKET

The Earliest Large Smooth, Scarlet Tomato in Existence.
Indispensable to the Market Gardener.
A Great Money-Making Tomato.

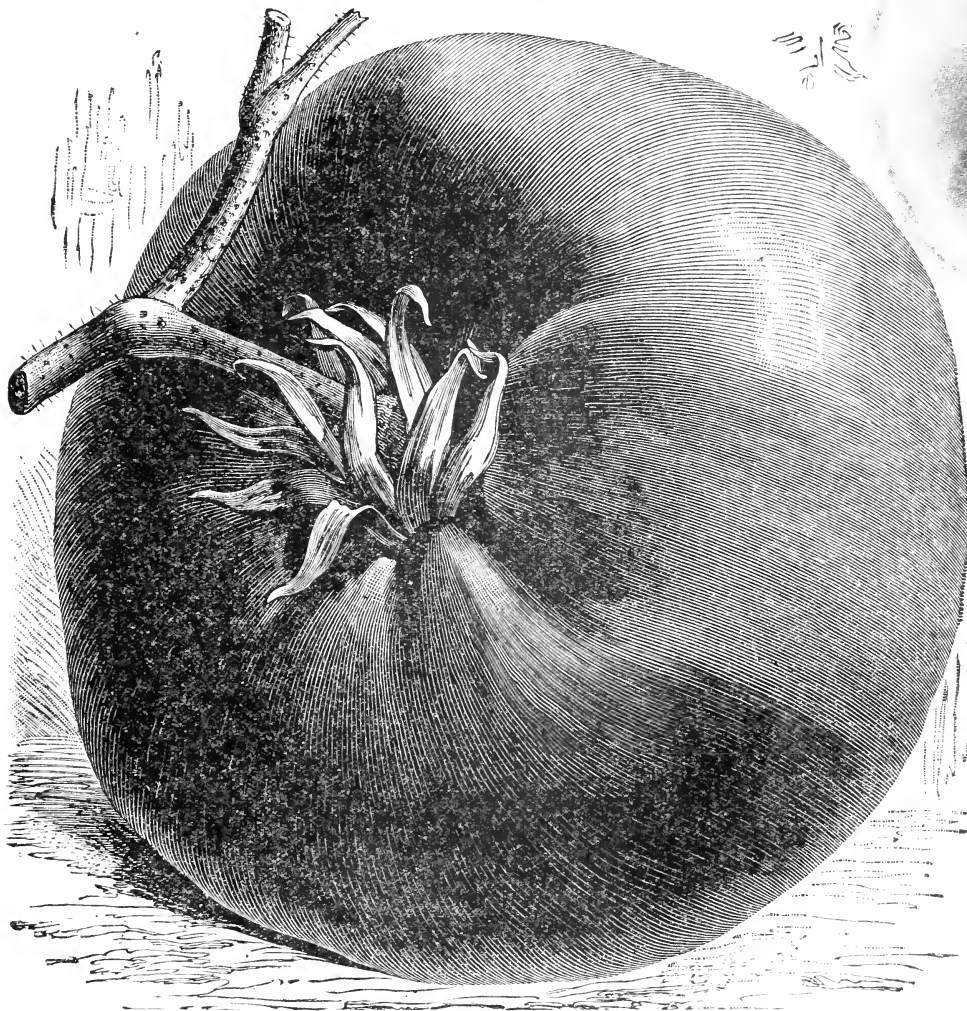

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a larger portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Buckbee's Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent kind also for the home garden, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1932. Pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40; ½ lb. \$2.50; 1 lb. \$4.50.

BUCKBEE'S NEW TOMATO ABRAHAM LINCOLN

The
Giant
of all
Tomatoes

BUCKBEE'S ABRAHAM LINCOLN
The World-Beating Tomato

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced by us in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each, or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

Edward Molnar, Budapest, Hungary—Your Abraham Lincoln Tomato is a great success. The most wonderful Tomatoes I ever saw.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—has superlative merit; it is a sturdy, healthy grower with distinctive bronzy-green foliage; it ripens its first fruits immediately following those of the early sorts and from that time until frost it is practically ever-bearing, yielding enormous quantities of tomatoes, no other variety approaching it in productiveness.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—on account of its solid character, splendid quality, rich red color of the flesh, and its appetizing appearance, is absolutely unsurpassed for slicing, salads and table use generally, while it is equally superior for baking, boiling and canning—the solidity of flesh and minimum of juice make thickening unnecessary.

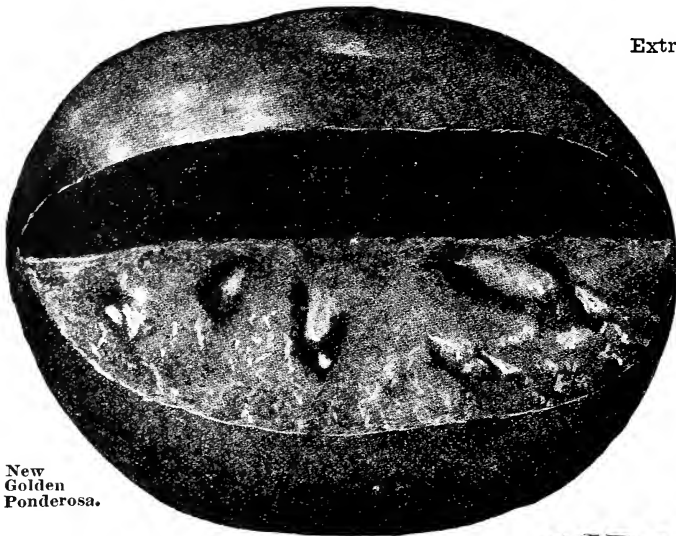

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—as a market variety, has already become very popular; its general merit and handsome appearance can not but attract buyers, and it is so solid that it "holds up" well when shipped, even though it does not have the thick, tough skin heretofore considered the most important requisite in a shipping tomato.

Seed of Buckbee's New Tomato Abraham Lincoln can only be obtained from the originator, H. W. Buckbee, Rockford Seed Farms. Buckbee's "Full of Life" Seeds are bred for disease resistant qualities. Pkt. of 150 seeds 20c; 3 pkts, 50c; ¼ oz. \$1.25; ½ oz. \$2.00; 1 oz. \$3.50. Postpaid.

Mrs. Joseph J. Ackerman, Center Brook, Conn.—Your Abraham Lincoln Tomatoes weighed over two pounds last year. I surely cannot afford to be without them.

Buckbee's New Early June Pink

The Earliest Pink in Cultivation—Medium Size, Round, Smooth and Solid.

The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, good-sized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40; ½ lb. \$2.50; 1 lb. \$4.50; 2 lb. \$8.90; 5 lb. \$21.95; 10 lb. \$42.40, postpaid.

New Golden Ponderosa

Extra Large Fruits—Heavy Yielder—Solid—Few Seeds.

Attractive and Reliable

A splendid novelty. Equals its famous parent, the Red Ponderosa, in every respect but color. It possesses its large size, heavy meat and luscious quality, and in addition is of a striking rich golden yellow color, making a novel and most attractive table effect, especially when served sliced with a red variety. This is the largest of the yellow varieties in cultivation. The fruits are very uniform in shape and size, contain but little core and few seeds, and are a solid mass of succulent meat. Their skin is thin and they ripen the first fruit quite early, continuing to bear until frost. Pkt. 15c; ½ oz. 30c; oz. 55c; 2 oz. \$1.00; ¼ lb. \$1.85.

The vines are healthy and vigorous, medium early, and bear large crops continuously until frost. Buckbee's strain is exceptionally fine, bearing smoother and larger fruits than are generally seen. Pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.70; ½ lb. \$3.15; 1 lb. \$5.75; 2 lb. \$11.25; 5 lb. \$27.50; 10 lb. \$52.45, postpaid.

Buckbee's Dwarf Ponderosa

A true Dwarf Ponderosa. The fruits are glossy purplish-red, with solid, meaty, bright red flesh; no core and but few seeds. They are fully as large as those of the Tall Ponderosa. Plants grow about 2 feet high, stocky and branching, bearing Tomatoes in great clusters from July until frost. This enormous but erect growing variety is one of the most important advances made in Tomatoes, especially adapted to the home gardens. Pkt. 10c; ½ oz. 30c; oz. 50c; 2 oz. 95c; ¼ lb. \$1.75.

BUCKBEE'S "FULL OF LIFE" TOMATOES

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's New Tree Tomato

Firm, Solid Thick Flesh, Large Meaty Center.

This grand Tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches its maturity. In color the fruit is purplish pink, form always round and symmetrical and of medium size. Buckbee's New Tree Tomato is immensely productive, clusters of four to six fruits being produced in abundance along the stem. All of the fruits grow to a marketable size. The table qualities are the best as this is a good slicing variety, the seed cells being surrounded by rich, heavy flesh. This feature also makes it desirable for canning. As a shipper it stands up remarkably well, arriving at its destination in fully as good condition as when it left the field. This wonderful Tomato leaves nothing more to be desired, as it is mild, pleasant and of delicious flavor. Being a strong, robust grower, it has a broad foliage which prevents sunburn in hot sections. Pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40; ½ lb. \$2.50; 1 lb. \$4.50, postpaid.

Buckbee's Snowball

The New White Tomato.

A grand new variety of recent introduction, which always gives the best of satisfaction. Color is pearly white inside, skin nearly the same shade, flavor unexcelled, flesh firm and solid. No better variety can be found for table, pickling or canning purposes. Pkt. 10c; 3 pkts. 25c; ½ oz. 40c; oz. 75c.

Buckbee's New Tree.

Strawberries from Seed

BRAZILIAN EVERBEARING

It will begin to bear fruit in about four months after seed is sown and continues to produce fruit until very late in the Fall. Seeds sown in April will give ripe berries in July. The berries are not as large as the standard varieties, but are of superior quality and have the rich wild Strawberry flavor. The plant is ever-bearing in the true sense of the word, producing fruit all Summer, and comes perfectly true from seed. It also makes a beautiful pot plant, will grow well in the house, and even fruit during the Winter. Perfectly hardy everywhere and easy to grow. A packet of seed should produce 40 to 50 plants. Pkt. 15c; 2 pkts. 25c.

THE BEST RUTABAGAS

For feeding stock in fall and winter there is nothing superior to Turnips and Ruta Bagas. If sown the first of August Ruta Bagas make an excellent pasture for sheep during the fall months, and the root will furnish a rich food for them all winter. All kinds of stock relish them and fatten rapidly when Ruta Bagas are fed in combination with hay.

Buckbee's Giant

This is the finest of all Ruta Bagas, and a variety that should be sown in preference to all others. Prize Winner Everywhere. This magnificent Ruta Baga, which is more largely grown than any other, is the most profitable to grow of all Swede Turnips. It is the largest of all, growing to much greater size than the American Purple Top variety, which is so much used in this country; it out-yields all other sorts; a crop of a thousand bushels and over per acre under careful cultivation, being a frequent

occurrence; it is the most hardy of all Ruta Bagas, withstanding cold and drouth better than any other sorts. Buds are somewhat oval or slightly oblong in shape; purplish red above and bright yellow below the ground. They are quite smooth with but a small tap root and have a small top and very short neck and remain sound and good indefinitely. Flesh is of a beautiful yellow color, always sweet, tender, juicy and nutritious. Prices: Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; 1 lb. \$1.00; 2 lb. \$1.95; 5 lb. \$4.75; 10 lb. \$8.45, postpaid.

New Monarch or Elephant

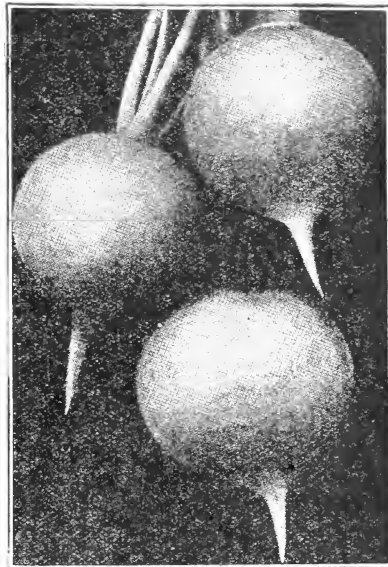

Produces large, tankard shaped roots, with small necks, relatively small tops; skin dark purple above ground, yellow below. Flesh rich yellow, fine grained; of the best quality. Easy to harvest. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 65c; 2 lb. \$1.25; 5 lb. \$2.95; 10 lb. \$5.50, postpaid.

Improved Purple Top Yellow

Very hardy, productive and nutritious. A large, purple top yellow variety. Shape slightly oblong. Produces heavy weight per acre. Sweet and good keeper. Pkt. 7c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 70c; 2 lb. \$1.35; 5 lb. \$3.25; 10 lb. \$5.45, postpaid.

Buckbee's Mammoth White Russian

Grows very large with single tap root, small top, short neck. Strong constitution; certain cropper. Will stand severest weather. Flesh white, hard, sweet, of better flavor than most yellow sorts. Fine for table and stock. Keeps sound till late Spring. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 65c; 2 lb. \$1.25; 5 lb. \$3.15; 10 lb. \$5.40, postpaid.

WONDERBERRY PLANT.
THREE MONTHS FROM SEED.

The Sunberry or Improved Wonderberry

THIS IS WITHOUT QUESTION LUTHER BURBANK'S GREATEST PRODUCTION; A LUSCIOUS BERRY THAT MAY BE GROWN AND RIPENED FROM SEED IN ANY SOIL OR CLIMATE IN THREE MONTHS.

Fruit more like a great, rich, luscious blueberry than anything else. Beautiful color, fine flavor and unsurpassed for eating raw, cooked, canned or preserved in any form. It is easily the greatest garden fruit ever introduced. Easiest plant in the world to grow. Succeeding anywhere and yielding great masses of rich fruit all Summer and Fall. **THE QUALITY** is sweet and delicious when fully ripe. Like the grape, it should have time to ripen well after coloring in full sun. Skin, which may seem a little tough in a raw state, cooks tender. Seeds small, one-quarter the size of Tomato seed, and cook soft, and are not noticeable. We offer this desirable garden delicacy in two distinct colors.

Burbank's Improved Wonderberry (the Original Blue Black Color), pkt. 12c; 2 pkts. 20c.

Burbank's Perfected Sunberry (the New Golden Color), pkt. 12c; 2 pkts. 20c.

PRICE OF PLANTS. We can supply nicely started plants, 3 for 25c; 95c per doz., postpaid.
(Be Sure to State Whether You Wish Wonderberry or Sunberry Plants.)

BUCKBEE'S "FULL OF LIFE" TOBACCO

Buckbee's "Full of Life" Tobacco Is Bred for Highest Quality

BEATS ALL OR LACKS—For the Black Belt of Virginia, Kentucky and Tennessee. It makes a big yield per acre and cures into a rich, gummy black leaf. Makes splendid black wrappers. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c.

BLUE PRYOR—A very large, heavy variety that is used extensively throughout the Black Belt for making either black wrappers or fillers. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c.

BRAZILIAN—A domestic cigar variety that is used quite extensively for home use. It is early, easy to handle and has a very pleasant aroma. Good for both wrappers and fillers. Pkt. 10c; $\frac{1}{2}$ oz. 40c; oz. 65c.

COMSTOCK SPANISH—One of the most popular varieties for making domestic cigar tobacco. It is used very extensively throughout the Wisconsin district and will be found the best variety to grow for home use. The leaf is rather long and of medium width, making it ideal for either wrapper or filler. And it is one of the easiest of all to cure and handle. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c.

GENERAL GRANT—One of the finest, earliest and most popular kinds for cigars. Matures as far north as Canada. Leaves large. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 55c.

IMPROVED GOLD LEAF—For the Bright Belt of Virginia, North Carolina, South Carolina, and Georgia no better variety has ever been found. It makes a product of excellent color and retains its weight. Thus growers obtain better returns. The leaf is long medium broad and tapers to a sharp tip. Cures into a bright lemon yellow when grown upon a medium fertile sand or gray soil. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c.

IMPROVED HAVANA—The finest Cuban stock, imported from the famous Vuelta Valley. Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c.

IMPROVED ONE SUCKER—For the Black Belt of Kentucky, Tennessee and Virginia there are few varieties that will make such a rich heavy leaf as this. The leaf is long medium wide and very tough, rich, and gummy when fire cured. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c.

IMPROVED WHITE BURLEY—This is the standard variety for the Burley Belt of Kentucky, Tennessee, Ohio, Illinois, Indiana, etc., and makes a manufacturing leaf of exceptional quality. Is easily cured into a bright yellow or rich red leaf of good weight. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 50c.

IMPROVED YELLOW PRYOR—This variety is often used in the Black Belt for air or fire curing and makes a good rich wrapper. Then in the Flue cured district it is used for making a lemon yellow wrapper. In either place it is an excellent sort and worthy of extensive cultivation. Pkt. 10c; $\frac{1}{2}$ oz. 35c; oz. 60c.

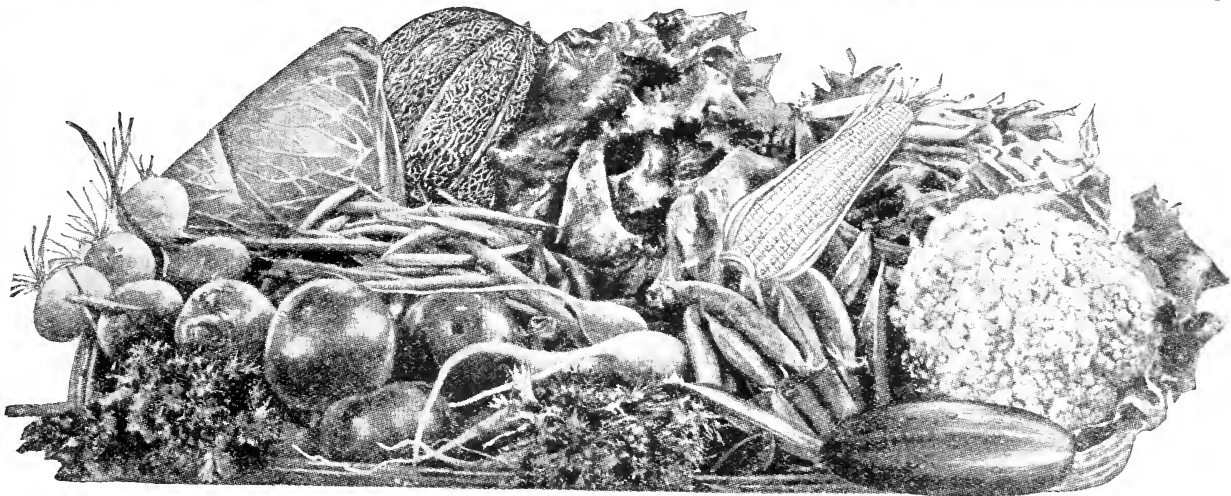

SWEET ORONOKO—This variety is adapted to a wide range of soils and uses. It will make a good black, mahogany, or bright tobacco and can be either Flue, Air, Fire, or Sun cured. For home use there is nothing better in chewing tobaccos. The leaf is long, narrow and cures into a heavy rich product. Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c.

VUELTA DE ABAJO—For those who wish an imported Havana tobacco, nothing finer than this can be found. It is the finest strain of cigar leaf grown in this country one year from imported seed. This gives it a stronger constitution, slightly larger leaf, but it still retains its rich gum and high flavor. Pkt. 10c; $\frac{1}{2}$ oz. 40c; oz. 65c.

BUCKBEE'S SPECIAL HOG PASTURE MIXTURE

Especially prepared for quick results and a full crop. This mixture is composed of the following annual varieties: Field Peas, Soja Beans, Vetches, Cowpeas, Crimson Clover, Rape, Sugar Cane, Japanese Millet, Turnips, Rutabagas, Speltz, Rye and other grains and forage plants, all in the right proportion. This mixture will provide an abundant pasture, within six weeks from day of sowing the seed, continuing green and bountiful until destroyed by frost; almost all of these varieties will come up again as fast as they are eaten down and will furnish 4 to 5 times as much forage as can be obtained from any clover-grass mixture, and this food is succulent and nutritious and much relished by hogs; it will keep them healthy and strong and they will gain in weight easily and quickly. This mixture will prove a most profitable investment for every farmer, not only for feeding hogs but also all other farm stock. It is usually sown about corn planting time, but can also be sown as a catch crop any time during the season until August. Use 100 pounds for 2 acres. Price, 10 lbs. 80c; 25 lbs. \$1.80; 50 lbs. \$3.15; 100 lbs. \$5.65, by express or freight not prepaid.

BUCKBEE'S FAMOUS "FULL OF LIFE" LAWN GRASS SEED

Buckbee's World's Fair Lawn Grass.

Buckbee's Famous "Full of Life" Lawn Grass Seed

Produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer. A lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with appearance and the permanency of the lawn.

Buckbee's World's Fair Lawn Grass Seed

A HOME AS MUCH AS A WELL KEPT YARD**

This famous Prize-Winning Lawn Grass is made up of a most evenly balanced combination of native and foreign fine-leaved, deep-rooting grasses that interweave and flourish in different soils and climates, each showing its best strength at seasons different from the others, and thus keeping the lawn vigorous and green from winter's end to winter's next advent. It is unrivaled for purity and luxuriance in growth and will give complete satisfaction wherever sown. With ordinary care, anyone can, by using this mixture, secure a beautiful lawn. Complete and explicit directions on "How to Make a Lawn" accompany every package of this seed. The quantity table on this page shows the amount of seed to plant in a given area.

Buckbee's Combination Lawn and Garden Invigorator

The Marvelous Lawn Tonic—The Wonder Fertilizer—The Unequaled Garden Medicine.
Made in Rockford—This Is Not an Experiment But Has Been Used for Years with Excellent Results.

Extensive experiments have convinced us that this unequalled Fertilizer or Garden Invigorator is the most wonderful product of its kind ever offered. This last season we have given it final and exhaustive tests, which have proven beyond a doubt that it should be used in every State in the Union. No matter for what purpose, or under what conditions it was used, the results were always the same—simply marvelous.

A Petunia Bed, with our combination Invigorator sprinkled lightly on the soil, showed an increase in size of the flower, and more brilliant colorings. Vegetables planted in poor soil in July when others were well started towards bearing, not only made heavier yields, but matured almost as soon as the earlier planted garden. Lawns with an application of 25 pounds to 1000 square feet grew heavier sod of a richer color, and were still as green on December 1st as in the Summer time. Keep a bag on hand always. You will need it almost the year round. For sale only by H. W. BUCKBEE, so send to us for BUCKBEE'S COMBINATION LAWN AND GARDEN INVIGORATOR. Packed in 3 size bags to meet all requirements. Shipped by Express or Freight at buyer's expense. 25 lbs. \$1.65; 50 lbs. \$2.60; 100 lbs. \$4.25.

Velvet Green Lawn Grass Seed

A SPLENDID STANDARD MIXTURE

This special mixture does not include so great a number of expensive grasses as our "World's Fair Mixture," but full provision is made for a succession of growth and a careful blending in proper proportion and thoroughly mixed for quickly producing a permanent, thick and velvety sward of uniform growth and rich green grass free from coarseness.

Price, postpaid, ½ lb. 20c; 1 lb. 35c; 3 lbs. 95c. By express or freight, not prepaid, 5 lbs. \$1.45; 10 lbs. \$2.80; 25 lbs. \$6.50.

Buckbee's Shady Place Lawn Grass Seed

**THE VERY BEST OBTAINABLE—CAREFULLY BLENDED—
YOU CAN HAVE A BEAUTIFUL LAWN WITH VERY
LITTLE WORK, BY USING OUR WELL**

BALANCED MIXTURE

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Price, postpaid, ½ lb. 30c; 1 lb. 55c; 3 lbs. \$1.55. By express or freight, not prepaid, 5 lbs. \$2.40; 10 lbs. \$4.70; 15 lbs. \$6.90; 25 lbs. \$11.25.

BURBANK'S MOLTEN FIRE

The Brightest Colored Foliage Plant in the World

An Unusually Brilliant Foliage Plant—Nothing Like It Has Ever Been Seen—Our Seed Originated in the Famous Burbank Gardens

Nothing can compare with this new hardy annual for abundance and brilliancy of color. About August 1st you will have a bushy plant more than 3 feet high with broad, bronzy-crimson, coleus-like leaves, of a clear, glistening, fiery, rose crimson, increasing in size and abundance until the whole plant is illuminated with huge tufts of flaming fire which can be seen for half a mile. These retain their brilliance for three months or more. Very easily grown. Pkt. 20c; 3 pkts. 50c, postpaid.

Burbank's Molten Fire

Frostproof Burning Bush

Buckbee's New Giant Frostproof Burning Bush

Easy to Grow and Very Decorative.
As a Hedge Plant is Brilliant and Showy.
Unequalled for Late Summer and Fall Show.

A grand new foliage plant for the garden. May also be used as a pot plant for Christmas and New Year decoration. This differs from the common variety of Burning Bush as it is more than twice the size and remains in splendid condition until after the New Year, while the old variety dies early in the Fall. The pyramidal bushes may be grown singly or in the form of a hedge. In the early Fall the whole bush becomes a flaming red—whence the name Burning Bush. The beauty of the plant is in its trim shape and brilliant coloring, which is often the only touch of color in an otherwise empty garden. Pkt. 10c; $\frac{1}{2}$ oz. 20c.

PLANT DEPARTMENT

Our Mammoth Greenhouses Contain Over 250,000 Square Feet of Glass Devoted to Growing Millions of Buckbee's Famous "Full of Life" Plants.

Buckbee's Lace Fern.

TWO WONDERFUL FERNS

Buckbee's Lace Fern

Graceful Bright Leaves, of Delicate Form and Unusual Beauty.

Buckbee's Lace Fern may be grown either as a pot plant or in window boxes and has the advantages of being more graceful, and having finer leaves than the most delicate fern. The individual fronds or leaves grow from 6 to 8 inches in width, and when cut and put in water, retain their shape and color for weeks. The bright green foliage of very delicate texture falls gracefully, giving it a style and air that cannot be surpassed. No finer decorative plant has ever been introduced. As a house plant it is deservedly popular as it will thrive under almost all conditions.

Strong young plants, 22c to 33c each, postpaid. Larger plants, \$1.00 to \$1.50 each, by express, not prepaid.

Buckbee's Feather Fern

Charming Emerald Green Foliage, Which Is Dense, Graceful and Drooping.

The plants are of rapid growth and grow freely the year around, producing sprays 4 to 5 feet long in the greatest profusion. Unsurpassed for window boxes or hanging baskets, in vases, or even as specimen plants. Grown in suspended pots, it makes a pretty decoration and desirable house plant. When the sprays or foliage is used for cut flower work, or in bouquets, it retains its freshness for a long time. We have a splendid stock of choice young plants, which we are offering at the following low prices:

Strong young plants, 20c to 30c each, postpaid. Larger plants, \$1.00 to \$1.50 each, by express, not prepaid.

Australian Silk Tree

A fine plant for the house, being of rapid growth with finely cut foliage. In its native place it grows large and has bright, orange-colored flowers. 25c each; 3 for 70c, postpaid.

Artillery Plant

Graceful frondlike leaves. When in flower, produces a snappy sound when water is thrown on the leaves. A thin, smoky vapor will also arise when the leaves are sprinkled. Altogether a very attractive novelty, besides being an ornamental house plant. Each, 19c; 3 for 52c, postpaid.

BUCKBEE'S BEAUTIFUL HARDY CLEMATIS

Wonderful Climber—Beautiful Flowers—Perfectly Hardy—The Most Attractive Flower Ever Grown

REGARDING CLEMATIS

The Clematis we offer this season are extremely fine, strong 2-year-old plants. Many failures in the growing of Clematis are the result of too shallow planting. The crown of the roots should be set at least 3 inches below the surface of the soil. On account of the brittleness of the bark on Clematis, it cracks very easily, which, however, does not harm it in the least.

Buckbee's Native Scarlet

It surely is a handsome, vigorous, climbing plant, growing 10 feet in a season. Commences to flower in June and continues until frosts. Foliage dies every winter, but comes up the following spring better than before. Fine plants, 75c each, postpaid.

Set out BUCKBEE'S "Full of Life" STRAWBERRY PLANTS.

Start Right! Get the Best. ORDER EARLY.

NOTICE—All varieties marked (S) are Staminate Perfect Flowering and Bi-Sexual varieties. All varieties marked (P) are Pistillate and destitute of Stamens. Therefore when planting varieties marked (P) it will be necessary to have every third row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.

For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

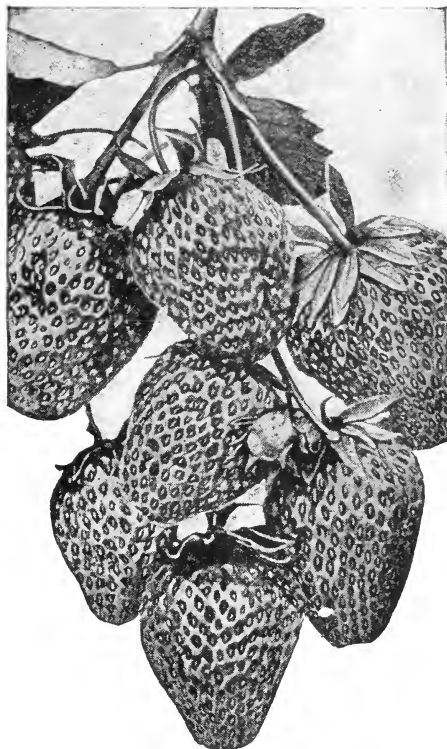

MONEY IN STRAWBERRIES

A Strawberry Bed is a safe and sure investment. Greatest of all Money Makers. \$600.00 profit per acre. Only one expense—the cost of plants, which is merely nominal—lasts for years.

EVERBEARING OR FALL-BEARING STRAWBERRY

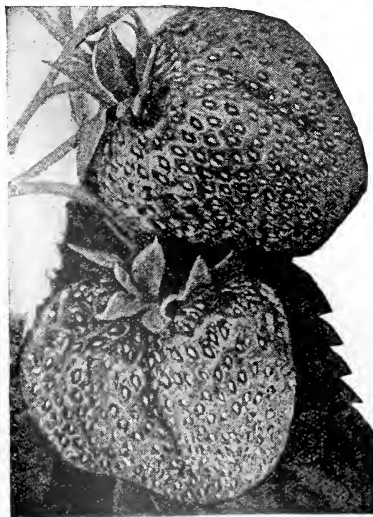

A dish of luscious strawberries in the fall is a luxury which everyone who owns a garden could enjoy. Plant at least twenty-five plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in the spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the fall crop.

WE WARRANT all shipments of Strawberry Plants to reach purchaser's hands in good growing condition and when so accepted no orders will be duplicated or replaced for any cause.
